---

Flock Safety,
I had my partner check each of our currently installed Flock cameras for function. Attached is a listing of the results and some images/videos to help illustrate the problems.
In summary:
Camera "008 EB Stowell (west of Kameo)" appears to have missed plates on 5-6 vehicles when we checked. Please adjust the timing and/or point of aim
Camera "#11 SB Alley (Chape and vine)" was designed to catch vehicles travelling southbound through the east parking lot of Louie B's bar. It appears to miss most vehicles. Please adjust point of aim more to the right to better catch s/b vehicles
Camera "024 WB Battles (east of Depot) image is purple
Camera "049 EB Donovan (west of Pepperwood) appears to have missed plates on 7 vehicles. We will take care of the tree trimming. Please adjust timing to get multiple images of each vehicle
Camera "110 SB Thornburg (south of Carmen) image is purple
Camera "120 WB Donovan (east of McClelland) appears to have missed just about every vehicle. Don't know if the point of aim changed or if it is zoomed in too much. Please adjust to catch westbound traffic.
Camera "066 NB Thornburg (south of Rochelle)" status shows severe. Earlier today there were no images. Now shows "Support for Uptime started on 06-13-23" so apparently you're already working on this one.

The following need tree trimming done. I've already notified our city tree trimmer.
Camera "#04 WB Inger (east of Broadway) pole 6559 on the north side of Inger
Camera "#09 SB Depot (north of Main) on the west side of N. Depot, just south of the driveway for 201 N. Depot "The Residences at Depot Street"
Camera #15 WB Williams (west of Broadway) Previously reported…near pole 2051 on the north side of W. Williams
Camera 047 EB Donovan (east of Western) near pole 1076, south side of the 900 block W. Donovan
Camera 054 NB Palisade (south of Main) on the east side of the 100 block S. Palisade

I think the videos are too big for an attachment. They can be downloaded directly from this link (no need to create an account)
